NGLISH AND CHINESE DICTIONARY, WITH THE PUNTI AND MANDARIN

PRONUNCIATION. An Anglo-Chinese Dictionary, published at the Daily Press Office, Hongkong.

For comprehensiveness and practical service this Work stands unrivalled. All the new words which the Chinese have to late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extenso. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Punti pronunciations are given; the accents being carefully marked on the bost principle hitherto attained. The typegraphy displays the success of an attempt to make the Policies against FIRE to the extent of £10,000 chinese and English type correspond in the size on any Building, or on Merchandise in the same, of body, thereby effecting a vast economy of at the usual rates, subject to a discount of space, schieving a clearness not previously Twenty per cent. (20 %). attained, and dispensing with those vast margins and vacant spaces which have heretofore characterized Chinese publications

To illustrate the vast scope of the work, the following facts are submitted for consideration :-Chalmers' Vocabulary contains about 16,000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of . 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, the. student of this difficult language absolutely requires examples to display the various appli-cations and equivalents of different words which have one general meaning. Of these examples this work contains more than five times as many as any other Dictionary hitherto pub-

For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English to communicate effectively with natives who understand nothing but Chinose. In this respect the work will be found indispensable to all Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted.
To parties resident in England and interested in China it cannot but be invaluable occasion-It comprises upwards of two thousand large
